1 Encryption and Secure Computer Networks   ▬
Gerald J. Popek, Charles S. Kline
December 1979 **ACM Computing Surveys (CSUR)**, Volume 11 Issue 4

Full text available: 📄 pdf(2.50 MB)   Additional Information: full citation, references, citings, index terms

2 VMTP: a transport protocol for the next generation of communication systems   ▬
D Cheriton
August 1986 **ACM SIGCOMM Computer Communication Review , Proceedings of the ACM
              SIGCOMM conference on Communications architectures & protocols**, Volume
              16 Issue 3
Full text available: 📄 pdf(1.40 MB)   Additional Information: full citation, abstract, references, citings, index terms

The Versatile Message Transaction Protocol (VMTP) is a transport-level protocol designed to
support remote procedure call, multicast and real-time communication. The protocol is
optimized for efficient page-level network file access in particular. In this paper, we describe
the significant aspects of the VMTP design, including the VMTP treatment of sessions,
addressing, duplicate suppression, flow control and retransmissions plus its provision for
multicast. The VMTP design refle ...

[1] **Authentication services for computer networks and electronic messaging systems**   ◼
Keok Auyong, Chye-Lin Chee
July 1997   **ACM SIGOPS Operating Systems Review**, Volume 31 Issue 3

Full text available: 📄 pdf(1.03 MB)   Additional Information: full citation, abstract, index terms

The paper surveys the authentication services used by modern computer systems and presents the major operational authentication services employed by commercial companies, banking as well as government departments. As distributed system services are susceptible to a variety of threats mounted by intruders as well as legitimate users of the system, password-based authentication is not suitable for use on computer networks.

Full text available: 📄 pdf(290.86 KB)   Additional Information: full citation, abstract, references, index terms

Oracle's corporate mission is to enable the Information Age through network computing, a vision of broader access to information for all and the empowerment and increased productivity that can result. The technology implications of the network computing vision are

ubiquitous access via low-cost appliances to smaller numbers of larger databases, accessed via professionally managed networks compliant with open internetworking protocols. The latest release of the Oracle data s ...

6 Untraceability in mobile networks

Didier Samfat, Refik Molva, N. Asokan

December 1995 **Proceedings of the 1st annual international conference on Mobile computing and networking**

Full text available: pdf(1.20 MB)   Additional Information: full citation, references, citings, index terms

Keywords: CDPD, GSM, alias, anonymity, authentication, location privacy, mobility, security
